SNIBBLES

REALLY Creative Problem Solving Lessons and Mind-Stimulating Exercises for Gifted Students and Their Teachers, Ages 5 through Really Old!

(ISBN 0-910609-50-0)

By Judy Micheletti

Teacher of Gifted Students Berwick, Pennsylvania

COST: \$18.00 + \$1.80 (10% P&H). Total = \$19.80

"In my twenty-four years of publishing books for educating the gifted, I have never published a more exciting, fun-filled and educational book than SNIBBLES. I personally guarantee that you will like this book and make good use of it with your gifted students/children." Maurice D. Fisher, Ph.D., Publisher Gifted Education Press

Written by a highly experienced teacher of the gifted who is a middle school gifted program facilitator and regional coordinator of Odyssey of the Mind.

Contains over 75 stimulating and fascinating exercises based on using ordinary objects found in the school and home.

The author has tested these exercises in her classroom for interest and ease of use.

The exercises can be used with groups of students or individually.

Among the items used to stimulate creative thinking are: Band-Aids, handkerchiefs, newspapers, pennies, sea shells, toy dogs, bottled water, egg cartons, chess sets, letter openers, paper clips, clothes pins, and dominos.

Contains numerous cartoon stick figures that reinforce the creativity lessons and entice students to expand their creative abilities. The cartoons alone will stimulate gifted students' creative responses!

About Judy Micheletti -- She is currently the Middle School Facilitator of Gifted and Talented Students in the Berwick Area School District, Site Coordinator of Odyssey of the Mind and a member of the Pennsylvania Association for Gifted Education.

DARE TO DIFFERENTIATE!**FOCUS ON THE HUMANITIES**

Dear Educator --

These books are required reading for all educators of the gifted who want a truly exciting and valid program for their students. In these times of severe budget cutbacks for specialized academic programs, is your gifted program defensible because it provides a strong differentiated curriculum uniquely suited to the special abilities of gifted students? By purchasing and using the entire set of our NINE DIFFERENTIATED HUMANITIES EDUCATION BOOKS, you will help to improve your gifted program's "survivability rate." I want every gifted program in America to survive and thrive during these difficult times. This is why I personally selected and worked with each author of our HUMANITIES BOOKS. I can attest to the fact that each one is an expert in his or her particular content area and has extensive experience in educating the gifted. This is why I strongly recommend a set of these nine books for every teacher (grades 4 through 12) in your gifted education program, and I will give you a 25% discount per set! THIS IS THE BEST BARGAIN IN THE GIFTED FIELD TODAY! Use these books to help prevent your program from becoming extinct, and to raise the horizons of your gifted students and their teachers!

Sincerely,

Maurice Fisher, The Publisher

“This exciting book will help gifted students to think and act like a scientist. I highly recommend it for the differentiated classroom.” Michael E. Walters, Ed.D., Educator and Gifted Program Specialist

- ❖ **Written by a professor of biology who is an expert in animal behavior.**
- ❖ **The subject matter can be used as part of a biology or psychology course, or as a resource for independent study.**
- ❖ **Promotes an Inquiry Learning Approach to solving the mystery of bird migration and homing.**
- ❖ **The author clearly shows how scientists engage in problem solving and conduct experiments to understand bird and mammalian homing behavior.**
- ❖ **Contains extensive Questions and Answers for each chapter. These Questions and Answers are one of the highlights of this book because they stimulate gifted students to reason about and analyze each problem concerned with homing and migration.**
- ❖ **Contains a list of hard copy and Internet resources that gifted students can use to expand their understanding of birds and mammals.**
- ❖ **Sixteen illustrations are included that show different research techniques and homing activities.**

Sample chapters are as follows: The Amazing Flight of the Golden Plover • Experiments with Homing Pigeons • Can Pigeons Use the Sun to Tell Directions? • What Happens When the Pigeons Can't See the Sun? • Are Two Compasses Enough? • How Do Birds Tell Direction at Night? • Homing in Other Vertebrates? How About Fish? • Amphibians and Reptiles • Mammals
